

# Recycling solutions of Toyo Ink

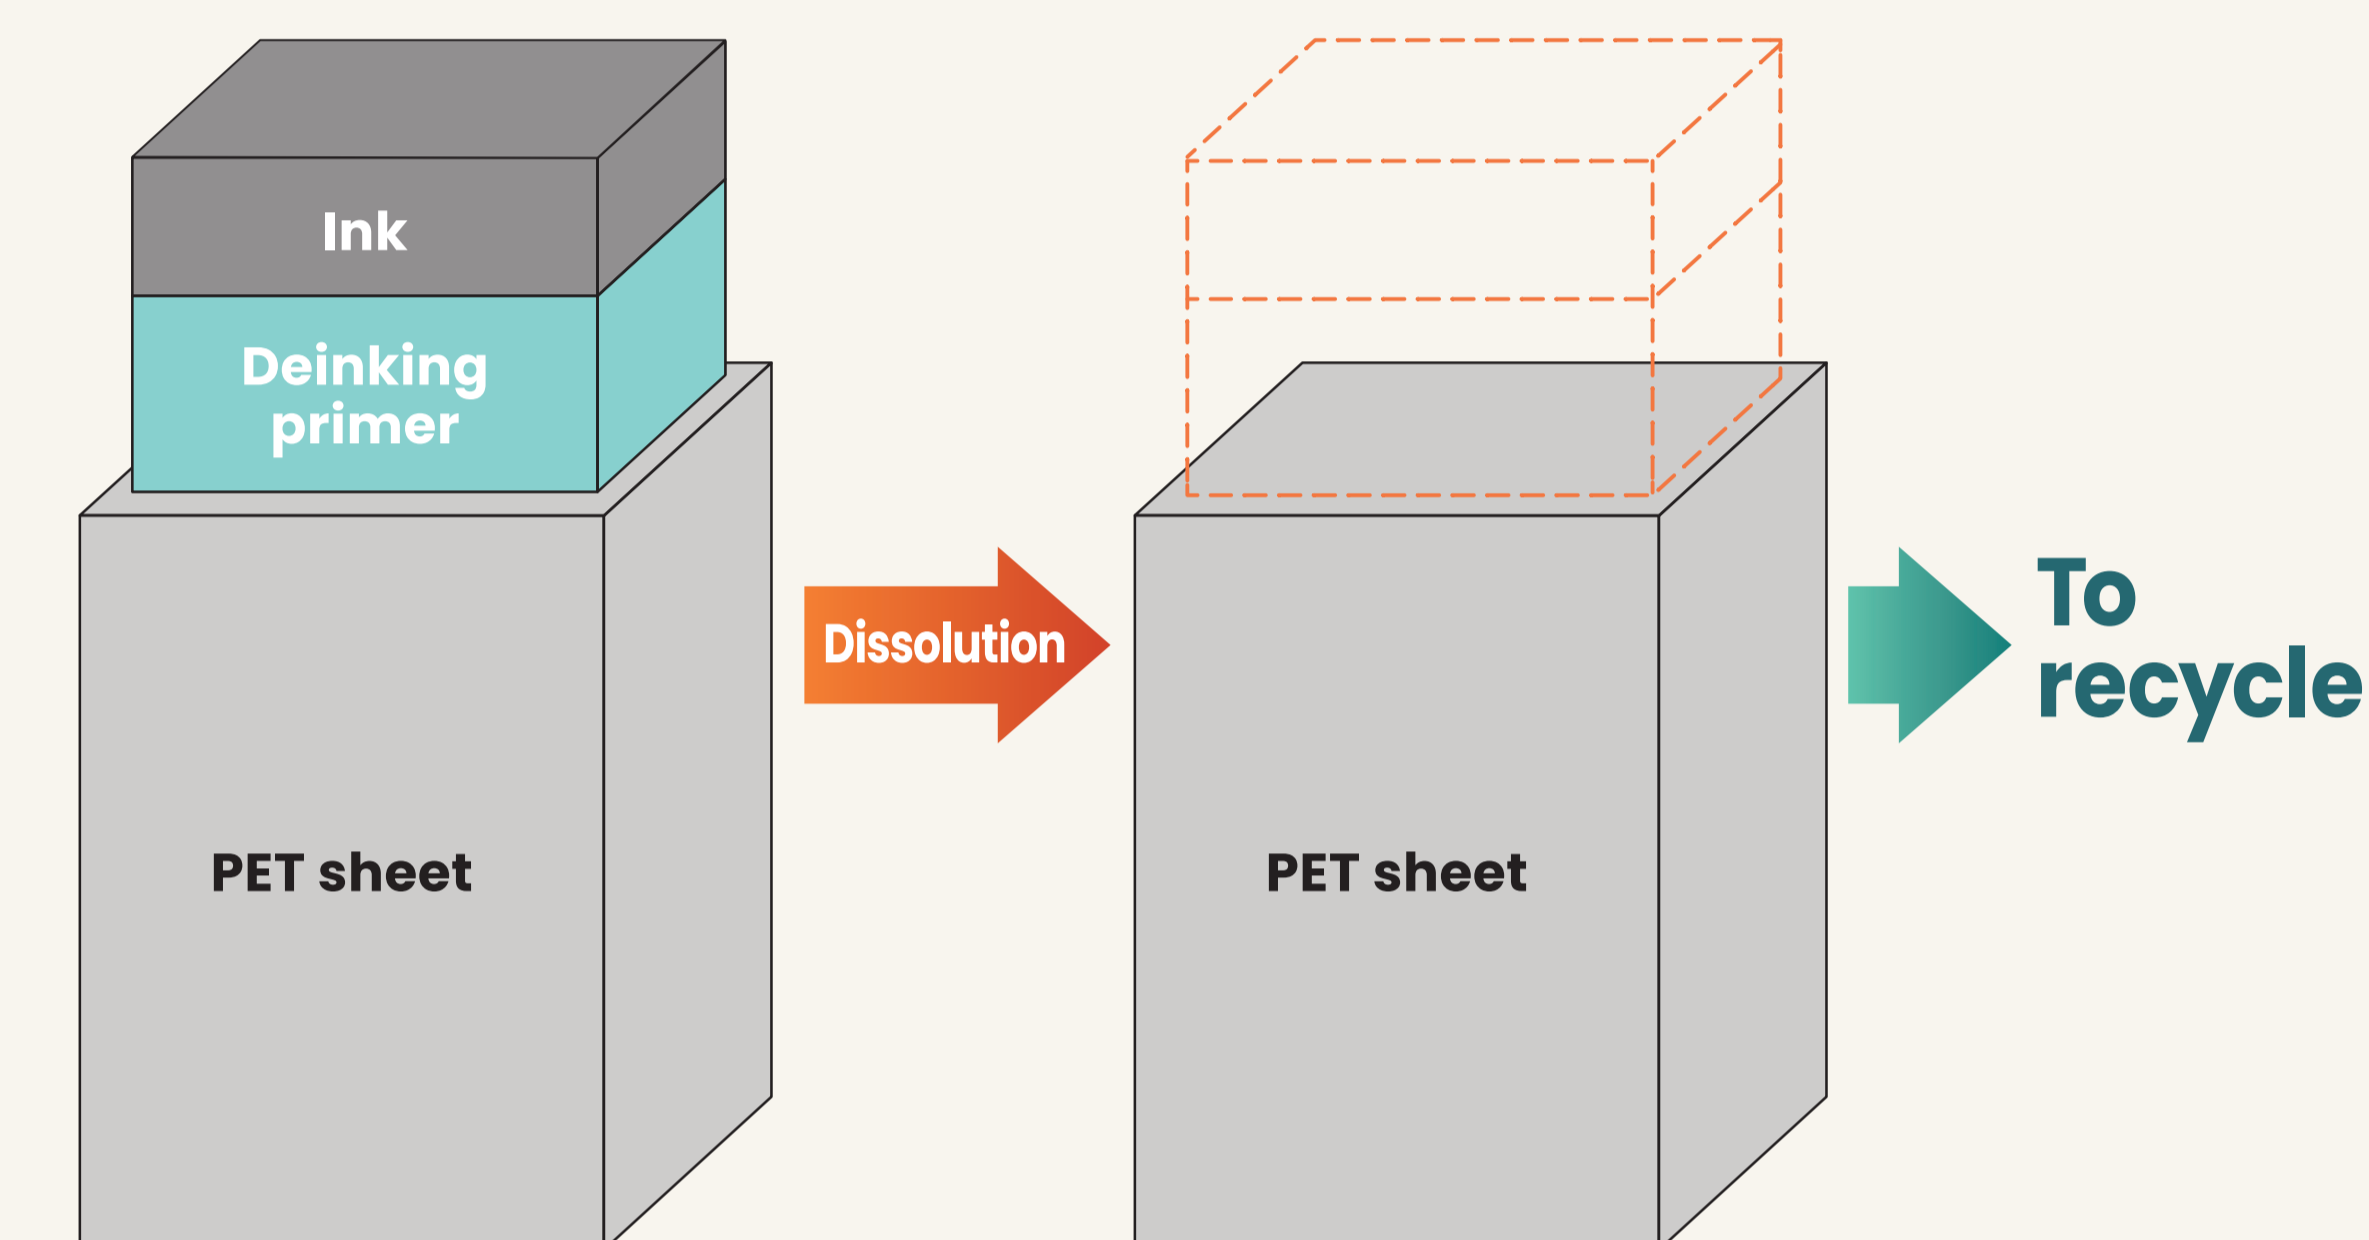

WEB

We have established a technology to remove "printing inks" and "adhesives" from plastic products such as packages and bottles during the recycling process, thus obtaining high-quality, high purity recycled plastic.

## Deinking and debonding of packaging films

## Deinking of rigid plastics

We are not only focusing on material development but also working with many partners, including machinery manufacturers, recyclers, and brand owners, to build a recycling system, aiming for the social implementation of material recycling in plastic packaging.
